### ABOUT ME

I wanted to be an Engineer as always. When I was completing my undergraduate degree in CSE at NSU, I was looking for perfection rather pass it with elegant CGPA. I faced some hard times during my graduation period and I tried to learn from my mistakes. In Professional life, I have learnt various skills over software development and always tried to enhance my knowledge. Also believe in networking and love to meet new people. I always face my problems and patient enough to find the quickest and effective solutions. Strongly believe in knowledge shearing. I've principally spent significant time in Web App Development both individually and team wise. I generally love taking challenges to adapt new devices, tools, technologies and innovations. I'm likewise a observer who likes to watch documentaries over global politics, Antient places. I also love to take pictures of nature, watching movies, travel and explore new places

### WORK EXPERIENCE
